BANGOR DAILY WHIG AND COURIER.

BY SMITH & SAYWARD. | MONDAY, MARCH 25, 1850. | VOLUME XVI.....NUMBER 226.

Bangor Daily Whig and Courier

IS PUBLISHED

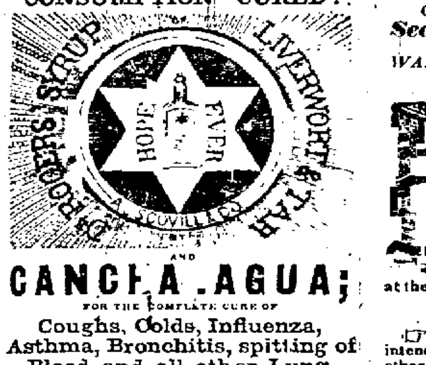

Over the Kenduskeag Market, at **Four Dollars** a year, payable half yearly in advance. All subscriptions for less than a year to be paid in advance, and all orders for discontinuance must be accompanied by the amount due.

The **BANGOR COURIER** is published at the office of the Daily Whig and Courier, every Tuesday morning, at **Two Dollars** a year in advance, or Two Dollars and Fifty Cents if not paid within six months from the time of subscribing.

☞ The publishers will not hold themselves responsible for any error that may occur, beyond the amount charged for the advertisement.

Mr. Elisha Field, Boston, is agent for these papers. Advertisements left with him will be immediately forwarded.

CONSUMPTION CURED!

AND

CANCHALAGUA;

FOR THE COMPLETE CURE OF

Coughs, Colds, Influenza, Asthma, Bronchitis, spitting of Blood, and all other Lung Complaints tending to CONSUMPTION.

READ! READ!!

This medicine is just what it is declared to be above. A remedy for the *complete cure* of all those affections of the Throat and Lungs, which, if neglected, always end in CONSUMPTION. It is not a worthless, *catchpenny article*, made just *to sell*, like many of the common nostrums of the day, but it is a strictly *scientific Preparation*—the original recipe having been furnished by an eminent Physician, (the late Prof. Rogers,) and that still further improved by one of the present proprietors, who is himself a *regularly educated Physician*, a graduate of the University of Pennsylvania. It is composed of the choicest articles in the vegetable kingdom, most of them of long-tried value and established reputation, and some of them *entirely new*, particularly the CANCHALAGUA, a plant of *most wonderful* medicinal virtues, lately introduced into this country from California. The Recipe has been shown to thousands of Physicians, who have universally approved of it, and will be shown to any Physician who desires to see it, upon application either to the Proprietors or their Agents. It has been used in *multitudes of cases*, and is strongly recommended by *Physicians*, even *Professors* in our Medical Colleges, Ministers of the Gospel, Judges, Lawyers, Merchants, Mechanics, &c.,—a conclusive proof that there is no *quackery* or *deception* about it, but that it is a medicine of most uncommon virtue and efficacy.

PAMPHLETS.

As no ordinary sized advertisement can *begin* to do justice to the merits of this article, the Proprietors have embodied in a pamphlet form, the *history* of this Medicine—the *description*, *nature*, &c., of its principal ingredients—the *effect* they are designed to have upon the human system—and above all, the *incalculable amount of good* which it has done. They design to circulate this pamphlet extensively; but should any one be overlooked, they are earnestly desired to call upon the Agents named below, and procure one, *gratis*. The *hints* on page 5th may be worth to yourself or family, THOUSANDS OF DOLLARS, and it will introduce you to a mass of testimony in its favor, which is perfectly irresistible.

Such being our confidence in its virtues, we are willing to *warrant* the Medicine in *every recent case*, (if used according to the directions,) and where the person is not satisfied that he is not deriving benefit from it, by returning the bottle within 24 hours' time,

THE MONEY

will be refunded. ☞ See page 3d of the Pamphlet.

For sale wholesale and retail by A. L. SCOVILL & CO., Proprietors, at their *Principal Office*, No. 65 Warren St., New York, to whom all orders for the Medicine, and letters relating to agencies, should be addressed, *post paid*.

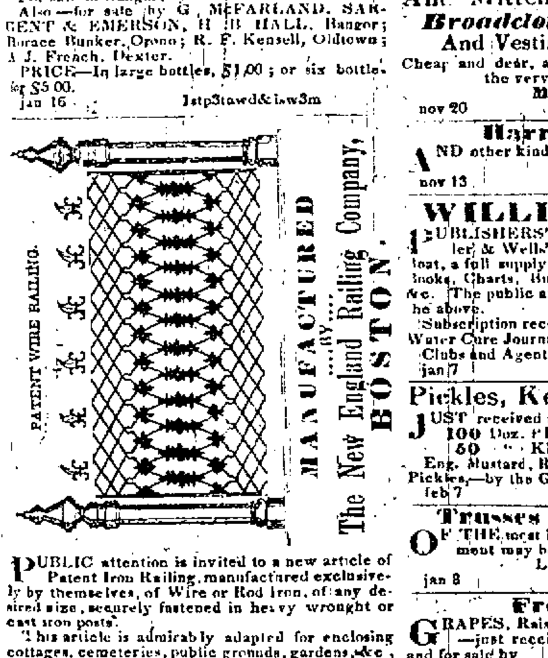

☞ Be sure to ask for *Dr. A. Roger's Syrup of* LIVERWORT, TAR, and CANCHALAGUA, and let no other be palmed on to you.

Caution.—*None genuine* unless there is on the buff wrapper, a *note of hand* signed with a *Pen*, by A. L. SCOVILL & CO.

For sale in Bangor, by LADD & INGRAHAM. Also—for sale by G. McFARLAND, SARGENT & EMERSON, H. B. HALL, Bangor; Horace Bunker, Orono; R. F. Kensell, Oldtown; A. J. French, Dexter.

PRICE—In large bottles, $1,00; or six bottles for $5 00.

jan 16 1stp3tawd&lsw3m

PUBLIC attention is invited to a new article of Patent Iron Railing, manufactured exclusively by themselves, of Wire or Rod Iron, of any desired size, securely fastened in heavy wrought or cast iron posts.

This article is admirably adapted for enclosing cottages, cemeteries, public grounds, gardens, &c., for balconies, columns, cornice work, summer houses, arbors, arches, verandahs, window guards for banks, stores, and all private dwellings, lattice work, grating for sky-lights, tree boxes, &c., and in fact, for all purposes where iron railing is required.

The comparative lightness, great strength and durability of the Wire Railing, the beauty of its varied ornamental designs, together with the *extremely low price* at which it is sold, are causing it to supersede the cast iron railing wherever their comparative merits have been tested. It is furnished ready for erection at prices varying from 35 cents to $2,50 per lineal foot.

For further information, patterns of designs, &c., please address LYMAN & CO.,
No. 1 Albany Block,
A few doors South of Worcester Depot.

** Persons intending to fence their Lots at Mount Hope are requested to postpone the same until early Spring at which time specimens of this fence will be erected for inspection.

Wilder's Patent

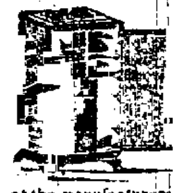

SALAMANDER SAFES

90 STATE STREET,
CORNER OF MERCHANTS' ROW.

Secured against Gunpowder

....AND....

WARRANTED NOT TO INJURE BOOKS OR PAPERS BY DAMPNESS.

THESE are the *only Safes* (WILDER'S PATENT.) that have in every instance preserved their contents when exposed to large fires, like the burning of the Tribune printing office in New York city and many others, too numerous to mention.

The above Safes are manufactured and for sale by JOHN E. WILDER, Boston, and for sale in Bangor, at the manufacturers prices, by
FISKE & DALE.

☞ **The Following Letter** from the Superintendent of the Maine Telegraph Company, is another proof of the superiority of JOHN E. WILDER'S Safe over all others:—

BANGOR, Oct. 21, 1849.

John E. Wilder, Esq.—

Dear Sir—The Safe I purchased of you was exposed to a great degree of heat at the burning of the Telegraph Office, in this city. It was in the fire six hours; the books and papers were uninjured, and the damage to the Safe very slight, although it fell from the second story to the basement of the building. The little repairs necessary to the Safe have been made, and we shall not need to return it. It is still as good as new.

Respectfully yours, JAS. EDDY.
Nov. 22, 1849. d6mis

HONEY! HONEY!!

BY BEES FED.

WHO ever supposed that the management of Bees and the making of Honey would be rendered a certain and profitable business? Yet it has been, and can now be done by all wishing to engage in the business.

A citizen of this State has invented a mode of treatment by which Bees can be managed without difficulty, and at a small expense, honey made at the rate of from three to four hundred pounds per swarm, each season. The right of adopting and using this mode has been secured by Letters Patent, and the subscriber has purchased that right for the County of Penobscot, so that he now offers the same to others, either by town or individual rights as may best suit purchasers, and on such terms as bring it within the reach of all wishing to engage in it.

The advantages gained by this Patent, are—

1st, A perfect command of the Bees, and a large increase of the swarms, without the trouble of hiving.

2d, A full security against the danger of robbing by neighboring Bees.

3d, The honey is of a better quality and much more in quantity per swarm, than has ever been made by Bees managed in any other manner. This is done by feeding, as by that means the Bee is not only rendered independent of flowers for his supplies, but able to give his whole time to the work of making and storing his honey.

4th, The opportunity is afforded of taking the honey at any time without disturbing the Bees.

Lastly, It furnishes a fine opportunity for all professional men of small salary to make a good addition to their income, and to aged persons and persons of feeble health to support themselves independently and that to with little or no labor.

Such being the advantages gained by this Patent the subscriber recommends it to the public and assures all wishing to purchase, that, on trial, they will find it answering their highest expectations.

His residence is at this place, where he will be happy to answer all those who may address him (post paid) on the subject.

PATENTS.

American and Foreign Office.

AGENCY FOR BUSINESS

With U. S. Patent Office,

WASHINGTON.

No. 23 STATE STREET, BOSTON.

IN 1840 the subscriber was appointed by the Commissioner of Patents, Agent of the U. S. Patent Office, in accordance with the 10th Sec. of Act of '37

Having relinquished the Agency for the transmission of Models, and adopted a more expeditious mode of sending them to the Patent Office, *whereby a Patent may be procured about six weeks earlier;* he continues to forward them free of expense—to prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings for Patents; and to render advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, inventors are saved the time and expense of a journey to Washington and delay there, as well as all personal trouble in obtaining their patents. They also have the advantage of *verbally* explaining their inventions, and of consulting in respect to them; *matters, in general, of paramount importance in order to obtain correct specifications and claims.* The experience of *sixteen year's practice*, an extensive collection of rare works, decisions, &c., on mechanical subjects the Patent Laws, and patents of different countries, collected at much expense during the long time this office has been established, together with accounts here kept of inventions patented at Washington, enable the subscriber to afford to inventors desirous of procuring Patents, assistance and information which in other respects might be difficult of attainment.
R. H. EDDY, Solicitor of Patents.

WASHINGTON, JULY 21, 1849.—During the time I occupied the Office of Commissioner of Patents, R. H. EDDY, Esq., of Boston, did business at the Patent Office as Solicitor for procuring Patents. There were few, if any, persons acting in that capacity, who had so much business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr Eddy as one of the best informed and most skillful, Patent Solicitors in the United States, and have no hesitation in assuring Inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE,
Late Commissioner of Patents.
Aug. 7, 1849. tSept 1850

GREAT IMPROVEMENT IN

Planing, Tongueing, and

Grooving Lumber.

JOSEPH P. WOODBURY'S

Patent Planing Machine.

THE subscriber having received Letters Patent for a stationary Cutter, Planing, Tongueing and Grooving Machine, now offers for sale Machines and Rights to use the same. This machine will plane 6,000 feet of boards to any uniform thickness, in one hour producing a better finished surface than it is possible to plane by any other means now known, not excepting the Hand plane, and is peculiarly adapted to plane and joint clapboards, or weather boarding, and will do the work faster and better than any machine heretofore invented. This machine is so arranged that it planes the board with an unbroken shaving the whole width and length of the material, and does not take more than two thirds the power that is required to do an equal amount of work by the Rotary Cutting Cylinder, now in common use. The construction and organization of this machine is different from any other now in use. Communications for further particulars cheerfully responded to by addressing the subscriber (post paid, Boston, Mass.

One of the above Planing Machines may be seen in operation by calling on the Patentee.

Whig and Courier.

John S. Sayward,—Editor.

MONDAY, MARCH 25, 1850.

☞ The Maine Farmer says that Mr. S. L. Goodale of Saco, who is unwearied in his exertions to introduce good fruit among us in Maine, states that he has just received some choice pear trees from France. They are of the best and most excellent sorts, and will be disposed of, at fair prices. Those who are disposed to cultivate this luscious fruit, cannot do better than to obtain some of them. A small nook of land will be sufficient for those that are on quince stocks, as they bear well, although dwarfted by his mode of engrafting.

FIRE IN GUILFORD.—On Tuesday Evening Last, the dwelling house of Mr. Daniel Remick in Guilford, took fire and was entirely consumed, together with most all its contents: the family saving nothing but one bed, and a bureau.—The family are in a destitute situation, and at this inclement season of the year, we hope the hand of charity will be extended to them.

☞ We devote a large space to the trial of Prof. Webster. It is a subject which now interests the public mind very deeply. We make the report of the trial as short as possible in order to a clear understanding of the case—more than this would be unnecessary and less than this would be useless if not trifling.

The President has issued an order to the Secretary of War, directing that the full uniform now worn by the army, a blue dress coat with white buff linings, band-box hat, &c. &c., shall be thrown aside, and the undress frock now worn shall be the full uniform, with the addition of epauletts, sash, &c. &c., the removal of which makes an undress uniform. The dress coat worn by the privates is substituted by a sack.

Mr Kirk of Cambridgeport has built a locomotive for the Kennebec Railroad Company, capable of running at a rate of fifty mils per hour, with a common passenger train. The frame work is constructed entirely of wrought iron, and the weight of the machine is twenty-one tons. It is to run on the broad guage track, and is named "Kennebec."

LINEAR PERSPECTIVE, for the use of Schools and Students in Drawing. By Joseph Ropes. Second edition, 1850.

Among the improvements in a system of general education for the people is that of giving all an acquaintance with the elements of Drawing by Perspective. One of the noblest enterprises in the Massachusetts Charitable Mechanics' Association was that of giving instruction to apprentices to mechanical trades in the art of Drawing. There ought to be a department for drawing in all our high schools and academies. This well executed work of Mr Ropes will materially aid the progress of the students whether at home or in the school; and if not a student in drawing in school they should be at home; since it lays down in an easy and intelligible manner the principles of the science of which it treats. It may be found at Mr Duren's Bookstore.

CHRONICLES OF CASCO BAY.

We have received from the author a neatly printed pamphlet of fifty-six pages, it being the first of a series illustrating the history of Casco Bay and of the Pilgrim Fathers. Much has been well preserved of the history of our country but much of absorbing interest still lies buried in the rubbish rooms of old families and becoming less and less so far as the earliest settlement of the different sections of the country is concerned. It is well to have all such hidden documents and letters brought to light and their essence preserved upon the printed page. This the author of the Chronicles is doing in an acceptable and highly interesting manner. The work when completed will make a volume of five hundred pages; and the parts will be issued at intervals of as yet uncertain length.

[For the Whig and Courier.]

MR. EDITOR—

On a perusal of the Mayor's address, I find the following paragraph in relation to the city schools:

'Regarding as I do the inculcation of a sound morality of greater consequence to our youths than every thing else, I think it incumbent upon the City Council to take seasonable measures to assure themselves on this point. If all be right it will be no harm if there be anything wrong then surely it should be done.'

I have heard many inquiries made as to the meaning of the above passage—and no one has been able to divine it. Something is certainly intended and upon a question which certainly interests the community. It is to be regretted that the views and perspicacity of our worthy Mayor's speech is bedimmed by a passage so obscure as the above and it is to be hoped that he will favor us with the forthcoming explanation.

Does he mean to intimate that there is any public teacher who does not inculcate a sound morality? INQUIRER.

BANGOR ART UNION. The Prizes of this Union, consisting of paintings by our worthy artist, Mr J P Hardy, were drawn at his rooms on Tuesday week. The number of prizes was thirteen, drawn from three hundred tickets.—The Paintings and the successful ticket holders were as follows:

No 1, 'Landscape,' Mrs S S Smith; 2, 'Fire Side,' E Paulk; 3, 'Hamlet,' Mrs M J Baldwin; 4, 'Girl and Dog,' Dr McRuer; 5, 'Copy of Rubens' Miss Elizabeth Crosby; 6, 'Dog,' T. B. Sanford; 7, 'Shipwreck,' Mrs Sarah Clark; 8, 'Robin Gray,' Mrs Crosby; 9 'Paul and Virginia,' C S Crosby; 10, 'Vesuvius,' S D Campbell; 11, 'Cottage and Cabin,' J S Wheelwright; 12, 'Green Bonnet,' James Crosby; 13, 'Boy and Squirrel,' E K Jewett.—Jeffersonian.

THE BOY T. H. SAFFORD. This remarkable mathematical genius, who has attracted so much attention by the early development of his peculiar powers, is made the subject of remark by Prof. Pierce, of Harvard College, in his report to the Visiting Committee of the Lawrence Scientific School. Safford attended the Professor's lectures on Analytical Mechanics, and showed himself perfectly competent to master this high subject of research. Up to this time he fully realizes his early promise of extraordinary powers as a geometer, but his friends notice with alarm that his body does not keep pace in growth with his intellect, and that he is not gaining that robust health so necessary to a strong mind. It will be remembered that he is under the charge of Edward Everett and Professor Pierce, and is supported by the liberality of gentleman in Boston.

Trial of Professor John W. Webster on the charge for the Murder of Dr. George Parkman.

SECOND DAY.

The visit of the jury to the Medical College this morning, was continued beyond the hour to which the Court adjourned, and it was a quarter to 10 o'clock when the Court came in.

The prisoner, who was conducted to his seat at about 8 o'clock, conversed occasionally with such of his friends as came along, and otherwise appeared to take his troubles with much philosophy. The Court room was very much crowded.

The first proceeding was to exhibit to the Court a plan of the premises at the College, where the murder of Dr. Parkman is alleged to have been committed. The drawing was shown by Mr. Bemis for the prosecution

City Marshal Francis Tukey called and sworn. I have partial direction of the police department. We commenced the search for Dr. Parkman on Saturday, 24th Nov, in the forenoon; Mr. Blake called on me, and I went to his office met Mr Robert G Shaw and others there. I notified the officers employed at the west part of the city to commence a search in the houses belonging to Dr. P.'s estate. At 2 o'clock that afternoon, I was requested by Mr. Shaw to inform the whole police force that the Dr. was missing.

Advertisements were put in the papers on Saturday afternoon; I think it impossible to have made a greater or more thorough search than was made for Dr. P. during that day and the following week; 28,000 handbills were issued, and men were despatched in every direction for fifty miles around the city; I drew up the handbills and submitted them to Messrs. Shaw, Francis Parkman and Blake. The first handbill offered a reward of $1000; the second $3000, and subsequently a reward of $100 was offered for Dr. P.'s watch. I think the remains were discovered in one week from the day he was missing. In consequence of information, I went to Mr Shaw's house in Sumner street, (the younger Mr. Shaw,) and from thence to the College. Dr. Bigelow (the younger) went with me; I went into Mr Littlefield's apartments and found officers Trenholm and Clapp; Littlefield, Trenholm, Dr. Bigelow, Clapp and myself entered beneath the College, into a cellar through a trap door.

We passed through an open space I should think 60 or 70 feet to a far corner, where we saw a hole about 18 inches square broken thro' the brick wall; the hole had the appearance of being recently made, brick and mortar laying along side of it.

[A very perfect model of the Medical College building was here exhibited to the Court and Jury. The model was so constructed as to be taken in pieces, thus showing the internal arrangement of the various rooms, the laboratory vault, &c. to the best advantage.]

Witness continued. We entered the trap door on the south side of the building; on reaching the hole I took a lamp and looked in saw what I took to be pieces of flesh; the water was coming through the outside wall. Mr. Trenholm went in and passed out the pieces to Mr. Clap there were three pieces, a thigh, part of the body and leg; Dr. Bigelow, said that was no place for dissected subjects. I asked Littlefield if there was any way to get into the vault except the communication from Dr. Webster's privy; he said there was not. We heard somebody overhead which we thought was Dr. Webster; we ascended to the laboratory by the door, and I passed in, while the officers looked for the person, we heard walking about in the lecture room; they did not find him. The officers accompanied me into the laboratory; it was the lower one; I saw pieces of cinders with bones mixed with it; Mr. Clapp took a piece in his hand. I directed the officers to leave every thing as they were, and left.

I next sent officers to Cambridge for Dr. Webster, and called upon Mr. Parker, the county attorney.

[A box containing the fragments of bones, teeth, &c. taken from the grate, was here opened by Mr. Tukey, and he testified to its having been in his possession since the coroner's inquest; the knife found in the tea chest was also shown. These things will be put into the case hereafter.]

Witness continued. I did not go into the college again that night; was on the outside of the building during the evening.

Cross examined. The first handbill was written by me, I think Saturday night, but was not printed till Sunday. On entering the aperture made through the brick wall, we were about one foot from a line with a hole in the privy over head. The remains were lying a little to one side from a direct line with the hole of the privy; can't tell the precise distance. Can't say which particular piece of the remains was most directly in a line with the hole. They lay a little toward the north wall. I think the tide must ebb and flow through the outer wall of the building. The water might flow through the crevices of the wall, but no solid substances. I only looked through the hole.

Several witnesses testified to having seen Dr Parkman on Friday the 23d of November.

Jabez Pratt, Coroner, called and sworn. I was called upon on the evening of Friday, the 28th Nov., between 9 and 10 o'clock, by officer Spurr, and went with him in a carriage to the house of S. D. Parker, Esq., in Mount Vernon street. We went from thence to the jail. Dr. Martin Gay was one of the party. I knew Prof. Webster, and saw him that night in a cell in the jail. Previous to going to the jail a warrant had been put into my hands for the arrest of Prof. Webster. We entered the lock-up under the jail office, Dr. Martin Gay, Mr. Parker, and others being of the company. Prof Webster was lying on his face on the bunk, apparently in great distress; Dr Gay endeavored to sothe his feelings, and requested him to get up; Prof. W. said he was unable to. He was violently agitated and trembled in every part of his frame, and exclaimed, "What will become of my poor family?" He was assisted from the bunk, and carried up stairs; two officers carried him up, he was nearly helpless, or appeared to be.

In the jail office he was seated in a chair; think he called for water; some person got him some; he was so agitated he could not drink; did not take the tumbler in his hand. Mr. Parker requested before going to jail, that no conversation should be held with Prof. W. relative to his arrest. Mr. Parker did not go down to the cell, but remained in the jail office. He stated to Prof. W. that some discoveries had been made in his premises at the Medical College, and said we called to see if he would go down and make such explanations as he felt disposed. He consented to go, and we went. Mr. Leighton, turnkey of the jail accompanied us. He had to be lifted into the carriage.—Heard Prof. W. say his extremities were cold. On reaching the college we all went up the front steps; he was taken from the carriage and led up the steps. There was some conversation in the carriage, but I have no distinct recollection of what was said; he complained of being taken from his family at night. Dr. W. entered the front door of the College, thence through the lecture room; Webster was supported by Messrs. Cummings and Leighton.

Next we went into the small laboratory at the foot of the lecture room, which door I believe was locked on the inside. I believe the door was broken open with an axe. Dr. W. said that was his private room where he made his chemical preparations, and it was dangerous; he said Mr Clapp had taken his keys, we all went into the room. Dr. W. pointed to a vat, and remarked that he wore it while lecturing; also that we must be careful and not break the bottles. On the opposite side from the door, in the small room, was some drawers and a closet; some of the drawers were broken open. Dr Webster objected to the looking, and said we should find nothing there but demijohns and bottles. A hatchet was found in the room done up in a paper; do not know who found it; we discovered nothing else in the room that we noticed.

We then descended the stairs to the labratory. I recollect no particular conversation between the parties here. Inquiry was made for the key of the privy. The Prof. said it was hanging on a nail.

I did not take so much notice of the rooms as some others, supposing I was there on official business. While we were in the labratory, a key was tried on the lock of the privy, which did not fit. The door was broken open by my direction, and the seats of the privy taken up. Some person inquired, where is the chimney? It was pointed out, and another observed, there is a furnace. Some person went to the furnace and took off the cover, and I believe took out some of the cinders. A piece of bone was found; crucibles &c. were about the furnace, some on top of it. During this time some one had Dr Webster by the arm. He called for water, and attempted to drink, but was so agitated that he could not. He appeared different from any man I ever saw before. On the water coming near his mouth, he would snap at it, as though it were offensive, and threw him into spasms. He apppeared more calm up stairs than in the labratory.

Mr Andrews, the jailor, came in while we were in the labratory; he went from thence to the cellar, where a trap door was open. Mr Clapp, Mr Littlefield and myself, went through the trap door, and got upon our hands and knees, and they passed out some parts of a human body; they went father in than I did.—Prof. Webster continued to exhibit great agitation. The party then left for the jail, and the remains were conveyed into the labratory. I left the college building in care of several officers, the remains having been placed in a box. I made no search that night.

Next morning I summoned a jury of inquired to assemble at 4 o'clock in the afternoon at the college. On going there, found additional parts of a human body had been discovered.—Several police officers were there, and may have assisted me in examining the furnace. We found pieces of bone, articles of something resembling gold, leads &c. On the top of the furnace there was a considerable quantity of ashes.

After taking out about half the contents of the furnace, I found some charred substances sticking to the jam back of the furnace, which I broke off.

At quarter past 2 the Court adjourned till half past 3.

AFTERNOON SESSION.

The Court came in at half past 3 o'clock.

Jabez Pratt, Coroner, resumed. In addition to the part I discovered sticking to the jam inside the grate, there was a piece of artificial jaw, and one or two manufactured and filled teeth; found the jaw and teeth near the bottom of the grate; the jaw was in one piece. The block of teeth was half way from the top of the ashes to the bottom of the grate; several teeth were found distinct from the jaw. I gave directions for the contents of the furnace to be given to the medical men and chemists. I sent for Dr. Jefferson Wyman of Cambridge, on Sunday, at the request of one of the medical gentlemen present with the jury. The remains of the body were put into the privy on Friday night for safe keeping. I took the bones from the grate on Saturday. The medical gentlemen were there on Saturday afternoon. I have in my custody a tin box, said to have been made by Mr. Waterman for Prof. Webster. I had a note from S. D. Parkman, Esq., stating that a box ordered by the Professor was at Waterman's shop. I went and got it in company with Mr. Parker. [The tin box was here shown. It has been at various times fully described in the history of this business.]

Cross-examined by Sohier. I do not pretend to judge of the contents of the furnace, but am sure there were some bones. The portion which was attached to the back of the grate I examined before I handed it to ... it appeared to be some single mineral teeth in the furnace.

Dr. Winslow Lewis, Jr. called and sworn. I was one of the physicians called to the Medical College; was called on Saturday; Dr. Martin Gay and Dr. C. T. Jackson met with me; Coroner Pratt requested my presence; I went about 3 o'clock. Dr. George H. Gay, Dr. Stone and Dr. Wyman were also present. Drs. Martin Gay and C. T. Jackson took charge of the bones and teeth. Drs. Gay, Stone, and myself prepared a report of what we had particularly inspected. We rendered that report to the Coroner's Jury. The report was reduced to writing.

[This report, drawn up and signed by Drs. Winslow, Lewis, Jr., J. W. Stone, and G. H. Gay, was here read to the Court and Jury by Mr. Bemis. It was very minute in detail, and comprehensive of medical and anatomical phrases, which were explained to the comprehension of the jury by Dr. Lewis, who in this way followed the reading of the report with a running commentary. It is doubtless a very able report, as it is very lengthy. It proved that the remains found in different parts of Professor Webster's premises constituted an individual body, muscular and devoid of fat, advanced in life. The left thigh had a string tied around it, just above the knee joint. The measurement of the limbs was made with precision, making, with the comparative length of the missing parts (the head and feet) the total length of the subject 5 feet 10½ inches. This was the height of Dr. Parkman.]

Dr. Lewis was then examined at considerable length by Messrs. Clifford and Bemis. I knew Dr. Parkman, and saw nothing in the appearance of the limbs and body submitted for examination dissimilar from what I should expect to find in the body of Dr. P. It bore no indication of being a subject for dissection. The remains were doubtless one and the same body. A block of mineral teeth about 2 inches long was handed to me, which I subsequently gave to Dr. Keep, a dentist. He afterwards returned them to me, and I placed them in care of the Coroner.

Cross-examined by Sohier. I have been acquainted with Dr. Parkman about 20 years. If I had not been told Dr. Parkman was missing, should not have thought it was his body. There were no peculiar marks about the body. We can get very near the height of a body by comparison, as in this instance; I should think within half an inch.

The opening in the chest I think was a stab. It had been affected by some chemical agency. The aperture was on the left side. The flesh was very soft from the action of this chemical agency. Cannot tell whether the aperture or wound was made before or after death. We discovered no marks upon the ribs; might say a person of similar frame would contain two gallons of blood; very little blood is found in subjects for dissection; I saw the furnace;—cannot tell with any accuracy how long it would take to consume by the action of fire parts of the body missing. I think the remains were those of a man about 53 years old; it might vary ten years. The lower limbs showed great muscular development. Dr. Keep examined the teeth, returned them to me, and I gave them in care of the Coroner.

By Mr. Clifford. From the wound in the side he would have bled internally, into the cavity of the chest.

THIRD DAY—THURSDAY, MARCH 21.

The court came in at 5 minutes past 9. The clerk called the jury, who all answered to their names.

The lower part of the Court room as well as the gallery was crowded with spectators. The prisoner gives his undivided attention to the testimony. Yesterday afternoon while Dr. Strong was upon the stand, a smile passed over his face at a quaint remark of the witness.

Dr C T Jackson called and sworn. Am a chemist by profession. Have followed practical chemistry for the last ten years. Was called to the examination of the remains found at the Medica College on Saturday afternoon, Dec 1, 1849. Met Dr Martin Gay and Dr Winslow Lewis. The chemical examination was assigned to Dr Gay and myself. Were shown the remains of a human body, and the contents taken from a small open furnace; took observat on of the remains. Did not think they had been used for anatomical purposes. They had not been dissected. The manner of opening the body I thought indicated some knowledge of anatomy.

Heard the lecture of Drs Lewis and Stone, and I agree with their testimony. Was acquainted with the late Dr George Parkman. He was a tall, slender man. I thought rather broad on the pelves. Thin on the laternal view, and not so much so in front. Discovered nothing dissimilar from what I supposed to be the conformation of Dr Parkman.

The flesh showed indications of having been subjected to a strong solution of phosphate of potash. [The analysis of the contents of the furnace, and of some chips of wood and other articles which Dr J. made, was presented in writing, to which he testified as given before the Coroner and Mr Bemis read it.]

The bones had the appearance of being exposed to fire—were much broken and partially fused in cinders. A tooth with a hole in it, having the appearance of having been filled by a dentist—a block of mineral teeth—a piece of gold plate—a pearl button—pieces of lead.—The ashes yielded globules of gold and some silver—in all 30 grains of gold were found.

Examined the skin and flesh of the therax, and found it corroded as if by potash, and submitted it to analysis; it yielded strong alkali.—Some parts of the skin appeared singed, as if subjected to the action of fire. Dissected the anterior of the thigh and delivered them to Dr Gay to see if any zinc or arsenic was to be found in them.

I was instructed by the Attorney General to take possession of articles left by Dr Gay [deceased.] Did so. Found the very papers that I delivered to Dr Gay, and gave them to Dr Crossley, who had begun the analysis for Dr. Gay, to complete the examination.

Dr Nathan C. Keep called and sworn. Am a surgeon dentist in this city. Have been in practise near thirty years. Am a neighbor of Dr Winslow Lewis. Have had occasion to give attention to artificial teeth. Knew Dr George Parkman as early as 1822. At that time I was a student of Dr Randall's. As early as 1822 he employed me, and I have been his dentist ever since. Have had shown me by Dr Winslow Lewis a block of mineral teeth. They were shown to me on my arrival in the cars, the Monday after Thanksgiving, between one and two o'clock. I recognized them as teeth that I made for Dr Parkman in 1845.

[They were shown him, and he said they were the same.]

Dr Parkman's mouth was very peculiar, differing in shape from other people's jaws; the relation of the upper and lower jaw marked it so peculiarly that the impression left upon my mind was very distinct. I remember the peculiarities of the lower jaw. The circumstances connected with those teeth being ordered were somewhat peculiar. The first question Dr P. asked was, 'How long will it take to make them?' On my telling him how long, I took the liberty of asking him why he asked that question, and he said the medical college was going to be opened on a certain day, and that he should have to speak on the occasion, and if he did not have them he did not want them at all. That time was rather short. The peculiarities of the mouth made it a difficult case, requiring as much skill as could be used.

I began as soon as possible, and gave a large part of my time to it from day to day—saw him frequently when it was in progress, and in consequence of these circumstances, I remembered very distinctly what was done, and the particulars of it more than in ordinary cases. I proceeded in my usual mode to take impressions. The first step was to take a fac simile impression of each jaw. This is done by putting a portion of soft wax into the mouth, attached to a piece of metal, and pressed down. When taken out it is oiled and a liquid plaster poured into it, which becomes solid and represents the shape of the gum itself. The upper jaw is done in the same manner, the wax pressed up, and taken off in the same manner.

The very day before his disappearance, he called on me, between 1 and 2 o'clock, to inquire about a servant that had lived with me—I inferred that he thought of employing him. I went into the country to pass thanksgiving, and returned Monday morning after thanksgiving; and, on reaching home, was informed that Dr Parkman was missing. And on this day, Dr Lewis presented to me three portions of mineral teeth, saying he was requested to bring them to me for examination.

On looking at them I recognized them to be the same teeth that I had made for Dr Parkman. The most perfect portion that remained was that part belonging to the left side of the lower jaw. I recognized the shape and the outline to be the same as the impression left on my mind that I had labored on so long. Several of the other portions had been very much injured by exposure to fire. I proceeded to look for the models by which they were made. On comparing the lower jaw with the model, the resemblance was so striking—

[The witness was so much affected as to be unable for a time to proceed. Dr Webster did not manifest any change of appearance under this testimony.]

[These several blocks were identified and showed where they belonged. This that I hold in my hand, there is no mistake, belongs on the right upper jaw. This belongs on the upper jaw. They were divided into three equal pieces and fit in. This is the remains of the front block above. This is the most injured. This with the other two I have described, makes out the ruins of the upper jaw. The left lower jaw is nearly entire.

The block attached to it, is not easily identified, I consider to be the back block of the right side of the lower jaw. There is a small piece that may or may not be the remains of the front lower block.

The rivets were soldered to the plate, and put into the teeth, but did not go quite through.

The left lower block is entire.

Several Physicians testified as to the mode of ascertaining the reation to the parts found.—This was all scientific and able.

FRIDAY.

Ephraim Littlefield called. I have no middle name; my connection with the medical college is that of janitor; I have charge of the whole building; make fires in the rooms, and have been janitor 7 years. Since last October I had charge of the college in Mason street; have known Prof. Webster since I first acted as janitor; knew Dr Parkman; was present at an interview between Dr Parkman and Prof. Webster; on Monday the 19th of November, towards evening, we were in his (Webster's) private room; I stood near the stone, stirring some water with salt; there were three candles burning at the time; the Professor was reading a chemical book, as I supposed, at the time; while I was stirring the water, I didn't hear any footsteps, but on looking up, suddenly, I saw Dr Parkman in the room. I observed that Professor Webster was surprised to see him appear so suddenly. Dr Parkman said, as I thought, Professor Webster are you ready to meet this to-night. The Dr afterwards said something about Dr Webster's having sold something to some person, which he (Webster) had before sold to him (Parkman.) Professor Webster said '—I do not remember that it is so—I had forgotten it.' Dr Parkman showed Webster some papers and then went towards the door, and raising his hand said 'Professor Webster,—something must be accomplished to-morrow.—Dr Parkman left the room and I have not seen him since: the following day about 1 o'clock, as I was standing outside the medical college, Professor Webster came to the door and asked if I was busy; if I was not he wanted me to carry a note to Dr Parkman, and said if I could not he should have to carry it himself; I took the note and gave it to my boy named John Baxter, I told him to take the note to Dr Parkman as soon as he could; Dr Parkman was at the College in the forenoon of the same day of the interview in the evening (alluded to above) Prof Webster asked me if the vault used to put the remains of subjects for dissection in, was repaired, and that the faculty had said something about having a new one made; he asked me how the vault was built under his coal bin, between the Laboratory and the dissecting room; told him that there was a leak in the coal bin that let the scent all over the building, and that the vault had been all filled up with dirt; he asked how I had got down to it; told him that I had taken up the brick floor, and then cut up the wooded floor beneath; he asked me if that was all the vault in the building; he asked me if I could get into that vault; told him no; he asked me if I was sure; I replied that I was, for I had already endenvored to get a light into the vault a day or two days before; he said he wanted to get some of the gas out of it.

To the Court. The foul air would put the light out.

Dr. Ainsworth had given me a skeleton to put in the vault a little while before to mascerate. I attemoted to put a light down there to find it, but the foul air put out the lamp; he told me he wanted to get some gas out of there to try an experiment; I said to him, 'How will you get it out?' Afterwards, said it would be a good time then, for the tide was up and was pressing the gas up; he said he had an apparatus to do it with, and said when he wanted the gas he would let me know; that was the last I ever heard of it. On Thursday W. said he wanted me to get him some blood for his lectures; took a glass vial holding about a qrt. from one of the shelves, and asked him if that would do to get it in; he replied, 'Yes, get it full if you can, from the Mass. Hospital.' I saw a student who attended in the apothecary's shop in the hospital, and told him that there was a glass jar, that Dr. Webster wanted some blood in it; he replied, 'I think likely we shall bleed some one to-morrow morning, and I'll save the blood:' on Friday morning I went over to the Hospital and saw the student; he said he hadn't bled anybody and so couldn't get any blood; I went to Professor Webster's room about half past 11 o'clock, and told him I could n't get any blood, he said, he was sorry—dont recollect anything further was said about it, dont recollect any further interview on that day. In the morning (Friday) after I had made the fire in his back room, I took a brush and swept the floor and threw the dirt in the fire, went to put the brush behind the door of the Laboratory and there I saw a sledge hammer; had seen the sledge in the lower rooms but never up there before—the handle was about 2 feet long and of white oak; should think that it would weigh 6 or 7 pounds.

To the Court—The sledge was about as large round, on the face of it, as an ordinary orange, cut in two; never saw the sledge any where but in the lower room before. I took it down stairs into the laboratory and set it up against the large vault where he makes his gases. [Here the plan of the laboratory was exhibited, and the position of the vault shown to the Court and jury.] Have never seen the sledge since; at about 2 o'clock I was standing in the front entry looking out of the front door; I thought when I testified before the Coroner's jury that it was about half past 1 o'clock, but I think now I was mistaken; I saw Dr. Parkman coming down Grove st. very fast; he was about opposite Fruit st.; I laid down on the settee nearest the furnace or register, and the door, waiting for Dr. Holme's lecture to finish; didn't hear any one go into or come out of Prof W.'s rooms; laid on the settee until a few minutes before 2 o'clock, and then went up stairs; always wait at the door of the lecture room till the lecture is out; I went down stairs and shut the front door just after Dr. Holmes went out; afterwards went down stairs, cleaned out the furnaces, and left the building the next morning's fire; then went up stairs into Prof. W.'s back room, and cleaned out the stove; I then went to the medical lecture room and cleaned the furnaces out there.

[Here the wooden model was exhibited, and Littlefield pointed out the position of the settee on which he had lain.]

I then went down to Prof. Webster's laboratory, to clean up there; went to the door of the laboratoy under the privy stairway, leading to the private room; this was the door under the laboratory staircase; found that the doors were bolted on the inside; I then went round to the other door of the laboratory, on the same floor, and found that locked or bolted. (Here the model was again brought into requisition.) Thought I heard him in there walking, and the Cochituate water running; I then went up stairs to the door that leads into the lecture room, in the front entry—put the key into the lock to unlock it; I found that it was unlocked and bolted on the inside; afterwards went down stairs into my kitchen and laid down; about 4 o'clock, a lady who was from Medford, and staying at my house, come into the bed room and said a gentleman wanted to see me; went to the door and found that it was Mr Petty; he had come to fill out a ticket for a student named Ridgeway who was going away; We filled out for him all but one for Professor Webster's lectures, that one I gave him myself—I had some of Prof. Webster's lecture-tickets; after Petty went away, (he said about 15 minutes) I again went to the door of the Laboratory found the doors all fastened at first. I went then to fix his fires and clean the room up; he, Prof. Webster, used to leave on his tables the glasses and vessels used in his lectures, and always requested me to clean them up. At about half-past 5 o'clock, as I was in my kitchen I heard some one coming down the stairs of the back entry. [Here the position of the stairs referred to was exhibited in the model.]

It was Dr. Webster. He had a candle-stick in his hand and a candle burning. He always used candles; I never knew him to use a lamp. He blew the candle out; placed the stick on the settee, and went out of the east passage way, what I call my door. I did not see Dr. Webster again that night. I fixed my elf and went out to a party, and got home about 10 P. M. I went to Mr. Grant's. When I came home I went to my kitchen, took off my outside coat, took a lamp to go and fasten the building up. The first door I went to was Dr. Webster's laboratory stairs door. I found that fast.

I then started to go into the dissecting room, that extends on the southwest part of the building. I went to put out the lights in the dissecting room, as the students dissected sometimes as late as 10 P. M. I saw no lights and no one there. I shut the door too, came out, and bolted the dissecting room door leading out. I found the door from the store-room bolted as before. I then went to bed. I had never found the doors locked before—not at night—all the time I have been at the college.

C. P. FESSENDEN'S

WRITING ACADEMY open day and evening, at No 71 Main Street. Mr. FESSENDEN, thankful for the flattering patronage bestowed upon him (and having located himself permanently in this city, as a teacher of penmanship) would solicit a continuation of the patronage of all those who wish to acquire an easy rapid and graceful system of writing, fitted for the counting room, or for ladies in epistolary correspondence. Those wishing to fit themselves to teach, will be fitted upon reasonable terms.

Cards marked to order with neatness and despatch. Terms—for 12 Lessons,—Gentlemen, $1,50. Ladies 1,00. Payment in advance. 4m mar 12

DR. GAY'S

Blood Purifier.

THIS invaluable remedy for diseases of the Blood has gained universal satisfaction, wherever it has been used, and its effects upon the system are so mild, pleasant and effectual, that all who use it are constantly speaking of its wonderful properties, and recommend it in the highest terms, to all who need the remedy. It is a certain cure for all

Humors and Diseases

of the Blood, for which purpose it is alone intended. Certificates in any quantity, can be obtained, of the almost miraculous cures it has effected, but it is now so well known that it is not deemed necessary to publish them.

SCROFULA.

This dreadful disease is disarmed of its terrors, since the introduction of Dr GAY'S BLOOD PURIFIER. This compound which acts at once the seat of the most celebrated physicians, readily yields to the virtues of this Blood Purifier, which, by its wonderful chemical combination, assimilates so perfectly with the Blood, that as soon as it is taken, it is absorbed into the circulation, and cleanses the blood throughout the whole system. Thus, by making the

Fountain of Life

pure, it destroys the poison humors throughout the entire body, and eradicates completely and quicker the cause of the disease.

It may be as well to mention that DR. GAY'S BLOOD PURIFIER is entirely vegetable in its composition, as safe as to the constitution as water! yet when a disease is to be attacked, or when a humor is to be expelled from the system, it will be found the most powerful and effectual remedy ever discovered.

Mercurial Affections.

Diseases caused by the improper use of Mercury, are readily cured by the use of the BLOOD PURIFIER, as are also Mercurial Rheumatism, Nervous Debility, Weakness, Loss of Appetite, &c., &c.

Pimples on the Face

are entirely removed by using one or two Bottles,—and in fact, all and every disease which is caused of produced by impure Blood.

CONSUMPTION!

This terrible and much dreaded malady, the scourge and bane of our climate, in its first stages, yields readily to the curative and purifying powers of Dr. GAY'S BLOOD PURIFIER, and in its more advanced stages, it seems from its peculiar affinity with the Blood, to stay the progress of the disease, and to sustain and prolong the existence and alleviate the sufferings of the unhappy patient. The

Muscular Strength

and activity, and the bodily and mental energies are rapidly increased under its use, whilst the increased color of the face and lips implies not only that the vessels are filled with more and better Blood, but that the BLOOD PURIFIER actually possesses the peculiar and wonderful properties of increasing the quantity of Blood in circulation. It will be useful for

Children of a Scrofulous Habit,

and those who are suffering from any kind of a humor. It is so very pleasant to the taste that they take it very readily, and it has a wonderful effect in removing all impurities from the Blood of the little sufferers.

BRONCHITIS

and Diseases of the Throat and Lungs,—DR. GAY'S BLOOD PURIFIER has a wonderful effect upon these and all Pulmonary Complaints. These difficulties are caused by humors which irritate the membranes of the Throat and tubes leading to the Lungs. The BLOOD PURIFIER by acting directly upon the Blood, removes the cause of the disease and the humors having nothing to sustain them, are completely and effectually cured.

In like manner DR. GAY'S BLOOD PURIFIER cures speedily and effectually, all

Chronic Complaints

and difficulties, arising from an impure or weak and impoverished Blood.

DR. GAY'S

Blood Purifier.

THIS is ... for ... of the Blood ... which ... Blood Purifier, ... all who use ... are ...

Humors and Diseases

of the ... is now ... to be ...

SCROFULA.

This dreadful ... of its terrors ... of Dr. GAY'S BLOOD PURIFIER ... *Blood Purifier*, ... the blood ... Thus by making the

Fountain of Life

pure ... throughout the ... and ... the ... Dr. GAY'S BLOOD PURIFIER ... vegetable ... water ... will be ... powerful and effectual remedy ever ...

Mercurial Affections.

Diseases ... by the use of Mercury ... Rheumatism, Nervous Debility, Weakness, Loss of Appetite &c &c

Pimples on the Face

are ... by using one or two bottles ... disease which is caused or produced by impure Blood

CONSUMPTION.

This terrible and much dreaded disease ... the first stages ... Dr. GAY'S BLOOD PURIFIER ... the progress ... of the unhappy patient. The

Muscular Strength

and activity of the bodily and mental energies are rapidly increased under its use, ... that the vessels are filled with ... and better Blood ... the BLOOD PURIFIER actually ... and wonderful properties of increasing ... the quantity of Blood in circulation. It will be useful for

Children of a Scrofulous Habit

and those who are suffering from any kind of a humor. It is so very pleasant to the taste that they take it very readily, and it has a wonderful effect in removing all impurities from the Blood of the little sufferers

BRONCHITIS

and Diseases of the Throat and Lungs.—Dr. GAY'S BLOOD PURIFIER has a wonderful effect upon these and all Pulmonary Complaints. These difficulties are caused by humors which ... the Throat and tubes leading to the Lungs. The BLOOD PURIFIER by acting ... removes the cause of the disease and ... nothing to sustain them are completely and effectually cured.

In like manner Dr. GAY'S BLOOD PURIFIER cures speedily and effectually ...

Chronic Complaints

and difficulties ... from an impure or weak and impoverished blood

Dr. Townsend's COMPOUND EXTRACT OF SARSAPARILLA,

Wonder and Blessing of the Age.

THE MOST EXTRAORDINARY MEDICINE IN THE WORLD

This Extract is put up in Quart Bottles—it is six times cheaper pleasanter and warranted superior to any sold. It cures without vomiting, purging, sickening or debilitating the Patient.

The great beauty and superiority of this Sarsaparilla over all other medicine is, while it eradicates disease it invigorates the body It is one of the very best

SPRING AND SUMMER MEDICINES

ever known, it not only purifies the whole system and strengthens the person, but it *creates new, pure and rich blood*, a power possessed by no other medicine ...

10 000 CASES OF GENERAL DEBILITY AND WANT OF NERVOUS ENERGY

Dr Townsend's Sarsaparilla invigorates the whole system permanently ...

INVIGORATING CORDIAL.

As it renews and invigorates the System ...

CONSUMPTION CURED.

Cleanse and strengthen. Consumption can be cured. Bronchitis, Consumption, Liver Complaint, Colds, Catarrh, Coughs, Asthma, Spitting of Blood, Soreness in the Chest, Hectic Flush, Night Sweats, Difficult or Profuse Expectoration, Pain in the Side, &c have been and can be cured

CAUTION.

Owing to the great success and immense sale of Dr Townsend's Sarsaparilla, a number of men who were formerly our Agents have commenced making Sarsaparilla Extracts, Elixirs, Bitters, Extracts of Yellow Dock, &c ... They generally put it up in the same shaped bottles, and some of them have stole and copied our advertisements,—they are worthless imitations, and should be avoided

For sale in Bangor by Sargent & Emerson Wholesale and Retail Agents, No 4 Smith's Block David Bugbee G W Holman, A P Guild mayd, '49 dawly

If thousands of Cures of Scrofula, Cancers, ... and other impure diseases of the Blood—and if the very SMALL QUANTITY which was used of a Medicine to effect C... of such Diseases be a proof of the purifying ... in the Medicine which has subdued ... such Diseases—then there is unquestionable ...

BRANT'S INDIAN [PURIFYING EXTRACT]

is such a Medicine in every respect and there is abundant proof in *great cures effected* that ONE BOTTLE of it contains *more* purifying healing virtue and medical power than there is contained in *Four Bottles* of any *sarsaparilla* or any *other medicine* that has ever been offered for sale There is undoubted proof in our pamphlets that by the use of this great *Indian Purifier* they that were DYING yet LIVE—they that were LAME and CRIPPLED can now WALK—they that were SICK SCROFULOUS and otherwise diseased have been HEALED and CURED

Hundreds—Thousands—

who have used BRANT'S PURIFIER, after having used and tested ALL the *sarsaparillas* and other medicines recommended to cure blood diseases, have *decided* that—

Brant's is the Cheapest,

because *One Bottle* of it has *more* medical curative matter in it, and in consequence cures *more disease* in much *less time*, than *one bottle* of any other medicine

If then *ONE Bottle* of BRANT'S PURIFIER will cure *FOUR TIMES* more disease than *one bottle* of *sarsaparilla* BRANT'S PURIFIER would be as *cheap* at *four dollars* a bottle as *sarsaparilla* at *one dollar* But BRANT'S PURIFIER is sold for only ONE DOLLAR a bottle and as a bottle of it *has cured* and is *capable of curing* Four Times as much disease as *one bottle* of *sarsaparilla*, therefore sarsaparilla in consequence of its *less* power and *less* medical efficacy should be sold at *no more* than *Twenty Five Cents* per bottle to be as *cheap* as the PURIFIER at *One Dollar*

One Dollar's Worth!

How much CANCER—how much SYPHILIS—how much SCROFULA—will *One Dollar's worth of Brant's PURIFIER* cure? Read the following statement, which is a specimen of its power

CANCEROUS SCROFULA!

This is the case of a *Dying man* who *yet lives* He was cured of a worse case of Scrofula by only *Twelve Bottles* of Brant's Purifier than ever was cured by the use of *Twelve Gallons* of the *best sarsaparilla* that was ever made Sarsaparilla has not *sufficient medical power* to effect the cure of such a *revoltingly hopeless case*

Mr J B HASKIN at *Rome, Oneida Co N Y* had Scrofula *four years*—was confined to his bed the *last year* He was so much diseased and debilitated as to be unable to raise his hand to his head He had the *best* medical advice—had used *all* of the *best sarsaparillas* to no good ... *worse and worse* and was considered to be in a *Dying State*, and could not live *twenty four hours* longer when he commenced using BRANT'S PURIFIER His *neck* was *eaten nearly off* from *ear to ear*—a *hole* was eaten through his *windpipe* under his chin so that he breathed through the hole—his *ear* was so eaten around that it could be *lifted* up out of its place, it only holding by a *small* piece—the use of *one arm* was *destroyed* by two Ulcers—an *Ulcer* under the arm as large as a man's hand had nearly *eaten* through his side *into his body* Thus he was afflicted with *Twenty* such *putrid acrid offensive Ulcers* on various parts of his person. For further and full particulars, see our *Pamphlets*

Doct THOMAS WILLIAMS one of the most skilful physicians of Rome was called to see Haskin the *day before* he commenced using *Brant's Purifier* Doct W examined him, and then told him that *all the medicines in the world* could *not cure* him—that his case was

Worse than Hopeless!

Now hear Mr HASKIN'S statement of cure He said My wife procured one bottle of *BRANT'S PURIFYING EXTRACT*—THAT BOTTLE enabled me *to get off my bed*—the SECOND bottle enabled me *to get out of the house*—the THIRD enabled me to *walk two miles* and when I had finished using *Nine Bottles* SEVENTEEN out of *Twenty* ulcers had HEALED UP and *three bottles* more effected a perfect cure and restored me to *good health*

FOURTEEN WITNESSES.

The above facts are certified to by DOCTOR T WILLIAMS Mr G R BROWN of *West Rome Hotel* Messrs BISSELL & LEONARD Druggists and ELEVEN other *respectable witnesses at Rome*

CANCERS CURED.

Mr O B KINNEY, merchant, *Clinton Oneida county N Y* informed us that a cancer-doctor in said county was effecting wonderful cures of *CANCERS* through the efficacy of BRANT'S PURIFYING EXTRACT A *cancer-doctor* in Greene county N Y is also using said PURIFIER Mr A B SYTTLE, druggist at Canajoharie Montgomery county, N Y has informed us of an important *cure of a* CANCER of long standing, which was effected on an aged lady of that place If therefore, this PURIFIER cures *Cancer* by its purifying healing power, what impure disease of the blood can it not cure? Seven years experience and triumph says there are none but what it will cure

FEVER-SORE CURED.

The Rev RICHARD DUNNING Pastor of the Presbyterian Church at ... Basin, Monroe co N Y wrote to us I have just received a letter from Mr CHANNEY DUNNING relative to the cure of his Fever sore You may depend on what it states for he is a Christian man and an elder in the church Some years since he had to have one of his legs *cut off* to save his life in consequence of a Fever sore The other leg being now affected and about to be amputated, I recommended BRANT'S MEDICINE Read the result He says *I have used only* THREE BOTTLES of BRANT'S MEDICINE *I placed* ALL HOPE, *from your recommendation in that Medicine*, and I can now say that with the blessing of God *it has effected a cure of my leg* See Pamphlets for full particulars

LIVER-COMPLAINT!

Dr NATHAN HUBBARD of *Stamford Conn* one of the oldest and most respectable physicians was afflicted with *Liver-Complaint* many years and was *perfectly cured by using* BRANT'S PURIFYING EXTRACT We could name hundreds of other cases also cured

FEMALE WEAKNESSES & COMPLAINTS.

No remedy offered to the public has ever been *half as certain and effectual in restoring* ALL the incidental *weaknesses* and *irregularities* of the sex as BRANT'S PULMONARY BALSAM It makes no difference whether the derangement be *suppression excess*, or other *weakness*—it REGULATES ALL, by *strengthening the* SYSTEM *equalizing the* CIRCULATION *and soothing and allaying* NERVOUS IRRITABILITY ☞See pamphlets.

CHANGE OF LIFE,

from the *girl* to the *woman* and the *woman at middle age*—the one case is *accelerated* and the other so *gradually suppressed*, as to prevent any of the *fatal diseases* that frequently arise in consequence of such change

Dyspepsia—Sour Stomach!

"ATTICA Genesee Co, *February* 1 1848.

"M T WALLACE & CO—*Gentlemen* I was for more than a year afflicted with a disease of the stomach I could not eat any fat or greasy substance without causing great pain sickness and vomiting, and was continually afflicted with a sour stomach I as an experiment tried one bottle of BRANT'S MEDICINE, which to my utter disappointment *eased and relieved the usual pain after eating* I therefore used a second bottle which has completely cured the disease I am now well and hearty and can eat almost any thing without being pained or the stomach becoming sour
Yours respectfully, T S WILCOX."

Mr Wilcox is a respectable merchant of Attica.

NURSING SORE MOUTH, LUCORRHŒA, &c

BYRON, GENESEE Co N Y Oct 19 1847

Messrs M T WALLACE & CO Some time last winter my wife became so debilitated from the effects of *Lucorrhoea* and *Nursing Sore Mouth* that she could not lift her child or perform any household labor Her medical treatment was varied according to the advice and prescriptions of the most eminent physicians until *our skill* was exhausted in unsuccessful efforts She became so very a skeleton that at the time she commenced taking *Brant's Medicine* she weighed no more than eighty five pounds, but by the time she had taken *four bottles*, she became perfectly well The cure is so perfect that she is now enabled to do all necessary household work, and gained thirty pounds of flesh in four weeks
Yours truly C B GALENTINE."

The reader will observe that Mr GALENTINE says "*our* SKILL." He, we are informed by Z S TERRY Esq, of the same place, has studied medicine.

MERCURIAL DISEASES.

BRANT'S PURIFYING EXTRACT is a *perfect and thorough eradicator of all the effects of* MERCURY or any of the various preparations of CALOMEL or MERCURY *from the system* and it restores the *blood, muscles* and *all the parts diseased*, to their original HEALTHY STATE

GENERAL DEBILITY OF THE SYSTEM!

Mr A HOLTSTANDER, merchant, *Oberlin Lorrain Co, Ohio*, wrote December 19, 1848, and after having stated how like a charm the PULMONARY BALSAM had effected the cure of his wife's consumptive cough said I have personally used *BRANT'S PURIFYING EXTRACT* for general debility of my system, and I have no hesitation in saying that it is the best medicine to RESTORE *and* INVIGORATE THE SYSTEM that I have ever used In *every instance* where we have sold BRANT'S MEDICINES *they have proved their efficacy and given the* BEST SATISFACTION."

SALT RHEUM,

and all impure *chronic diseases of the* BLOOD are always cured by *BRANT'S EXTRACT*

PUBLIC attention is invited to a new article of Patent Iron Railing manufactured exclusively by themselves of Wire or Rod Iron of any desired size securely fastened in heavy wrought or cast iron posts

This article is admirably adapted for enclosing cottages cemeteries public grounds gardens &c for balconies columns cornice work, summer houses arbors arches verandahs, window guards for banks stores and all private dwellings lattice work grating for sky lights tree boxes &c and in fact for all purposes where iron railing is required

The comparative lightness great strength and durability of the Wire Railing, the beauty of its varied ornamental designs together with the *extremely low price* at which it is sold, are causing it to supersede the cast iron railing wherever their comparative merits have been tested It is furnished ready for erection at prices varying from ... cents to $2,50 per lineal foot

For further information patterns of designs &c please address LYMAN & CO,
No 1 Albany Block
A few doors South of Worcester Depot

_ Persons intending to fence their Lots at Mount Hope are requested to postpone the same until early Spring at which time specimens of this fence will be erected for inspection
